

IT 505 Milestone Three Guidelines and Rubric

Prompt

You are a new employee at an IT help desk. The organization that you work for has computers that are due for an operating system (OS) upgrade. Your supervisor has provided you with components of the implementation plan to carry out in order to facilitate a smooth upgrade process in each department.

For Milestone Three, you will prepare and submit a three-slide presentation explaining information assurance needs including risks associated with nonadherence to information assurance processes, and countermeasures to mitigate risks. You will also prepare two one-page tutorials. The first tutorial is for setting the company website as the homepage and the second for enabling and disabling cookies.

Guidelines for Submission: The slide presentation should consist of three slides using Microsoft PowerPoint. Written components of project must follow these formatting guidelines when applicable: double spacing, 12-point Times New Roman font, and one-inch margins. The tutorials should be one page in length.

Critical Elements	Exemplary (100%)	Proficient (90%)	Needs Improvement (70%)	Not Evident (0%)	Value
